# **Railgate Finland - Smart Hub Solutions (SHUBS) project**

- The Railgate Finland - Smart Hub Solutions (SHUBS) project is a continuation of the development project "Kouvola Railway and Road Terminal (Intermodal Terminal) RRT" led by Kouvola City
- The concrete objectives of SHUBS project can be summarized as follows:
  - Export and import concepts for intelligent container train logistics developed ready to launch
  - Strengthening international logistics activities as a logistics hub

# The main tasks of the project are

- Developing a concept of e-commerce distribution terminal with value adding operating model
- Functional testing and transporting trial shipments
- Design and conceptualization of digital / intelligent logistics solutions
- Developing a concept of export terminal / import terminal

# Thank You!
